

Mobile Escape Room

prosolve.com

Teacher and Administrator Team Building and Professional Development

WHY A MOBILE ESCAPE ROOM?

Technology can find and filter information faster than humans, making information a commodity. Hence, we must develop **human intelligence**: our ability to use information to solve real problems. We think escape rooms have mastered this concept, so we built one on wheels to role model the problem solving pedagogy we believe is essential for the future of education.

Role Model the Four Cs

Through station-based learning, participants leverage **C**reativity, **C**ommunication, **C**ollaboration and **C**ritical Thinking. They experience micro-leadership with different challenges designed for different skillsets.

Showcase Strategies and Resources to Engage Students

Participants interact with a variety of technologies, including AR, 3-D Printing, coding, and software applications that can be implemented into daily learning strategies.

Build Camaraderie Across Departments and Teams

Break down social barriers with interconnected challenges that require effective communication and collaboration in a time-pressured environment, creating an unforgettable shared experience.

WHAT IS IT?

The QUEST Escape Room travels the country providing a team-building and professional development experience for teachers and administrators.

The QUEST Escape Room is a simulator that tests a group's ability to work together and solve problems. After entering the simulator, groups have 30 minutes to solve several global crises happening while being immersed in the world of QUEST.

Most importantly, after the 30 minute challenge, participants have a 20 minute debrief about their "Aha!" moments experienced while playing as it relates to teaching strategies and student engagement.

QUEST | Mobile Escape Room

Teacher and Administrator Team Building and Professional Development

HOW DOES IT WORK?

This experience is ideal for staff PD days, district central offices, school events, conferences, or staff meeting days.

The ideal target is primarily administrators and teachers in order to create the most impact. However, students can participate as well.

In a single day, we can provide up to six one-hour sessions, with 8 to 12 people playing per session.

Designed for teachers and administrators

Supports groups of 8 to 12

Each group plays for 1 hour

WHAT PAST ESCAPEES HAVE SAID

“It exercised my understanding of how to be effective at integrating different standards, with different content and modalities that reside with different learners. The experience entailed 100% engagement and allowed for application of different skills to occur.”

“The QUEST Mobile Escape Room is an amazing opportunity for both students and educators to work together on team building skills in a fun, challenging, creative environment!”

“Many of the students said it was the best day they ever had at school. One 5th grade boy with an IEP who barely reads at a 1st-grade level due to a severe speech impediment and extreme ADHD became an active participant in solving the puzzles with his teammates. He was walking on air the next day, telling everyone about his participation in the escape room.”

Do you have what it takes to solve the **QUEST Mobile Escape Room**?
